Connecting Information Technology to Prosperity

Barry Dancer

*Programmer 1,
National Interstate Insurance*

After three years as a stay-at-home dad, Barry Dancer spent eight months looking to re-enter the workforce. Interested in technology, he joined The Software Guild coding bootcamp. Beyond learning programming skills, Barry was excited to connect to the Guild's hiring partners. "They work really hard to give you exposure," he says. After joining National Interstate Insurance, Barry's income increased almost 20%.

Rachel McGalliard

*Vice President of Operations,
The Software Guild*

Rachel McGalliard understands that traditional education can't always fill the skills gap that job seekers like Barry confront. That's where ConxusNEO partner The Software Guild comes in. "An immersive program in coding and software can get people like Barry into a job they want for a fraction of the time and money," Rachel says. But she notes it also takes brave companies willing to hire talent in a new way.

Tony Prinzo

*Talent Acquisition Manager,
National Interstate Insurance*

As Talent Acquisition manager for Summit County's most active IT employer, Tony Prinzo understands how important it is for job candidates like Barry to have solid skills when hiring on with National Interstate Insurance. "We've found The Software Guild to be a good strategic partner with a solid curriculum," he says. "We're thrilled to have Barry."
